- 1:00 pm - 2:00 pm  New-Pen-Del Annual **General Membership Meeting**
- 2:00 p.m.  Following the Annual Meeting the **Brown Bag Auction**, and **Grooming Chest Raffle** Winners will be selected

# Specialty Cart & Wagon Exercises Certification Testing

- 🍂 This is a great opportunity to prepare for the Draft Test! Or to test you and your dogs Draft work capabilities.
- 🍂 All testing is performed within a ring, you can test with or without a lead, and no long haul testing is required.

The exercises have been designed largely for people interested in exhibition cart and wagon activities, and have been chosen to test the abilities of dog and handler to meet the tasks required for activities such as parade carting. These regulations also attempt to stress a working relationship between dog and handler. Judging is on a pass/fail basis because every-day cart and wagon activities are diverse; no standard short set of exercises can adequately test all draft abilities of all dogs entered.

## ***Regulations and Descriptions***

### ***I. Divisions and Exercises.***

#### **A. There will be 2 divisions, On-Lead and Off-Lead, into which there can be individual and team entries.**

1. Individual dogs and teams may be entered in either division or both divisions; those that fail in On-Lead may not compete in Off -Lead.
2. On-Lead Division will be judged first and in each division individual entries will be judged before teams. A dog or team that passes On-Lead Division may immediately attempt Off Lead Division without repeating the Harnessing and Hitching exercise.
3. A team consists of 2 or more dogs working together with only 1 handler; failure of any single dog in a team on any point constitutes failure for the entire team.

#### **B. On-Lead Exercises and Descriptions.**

1. Harnessing and Hitching.
  - a. The dog allows itself to be harnessed and cooperates in being harnessed.
  - b. The dog allows itself to be hitched to a cart or wagon and cooperates with the hitching.
  - c. A dog or team that passes On-Lead Division and immediately attempts Off-Lead Division is considered to have passed Harnessing and Hitching for Off -Lead Division
2. Basic Commands.
  - a. The dog must be able to perform the following tasks:
    - i. Pull the cart / wagon forward at a normal hauling pace.
    - ii. Respond correctly to a command to pull more slowly.
    - iii. Respond correctly to a command to halt.
    - iv. Back up 3 measured feet.
  - b. During the exercise the handler may walk next to, before or behind the dog; the handler may face the dog to command him to back.

3. Maneuvering Course.
  - a. While staying close to and attentive to the handler, the dog must maneuver a course with
    - i. 3 broad 90° turns.
    - ii. 2 broad U-turns.
    - iii. A removable obstacle.
  - b. The handler may request that markers for turns be moved slightly if the allowed turning space is inadequate for the cart/ wagon being used; space for turns should not be so tight as to require a stationary wheel on a cart/wagon during a turn.
  - c. During the exercise the handler may walk next to, before or behind the dog:
  - d. The dog may not knock over the markers for turns.
  - e. The removable obstacle should be something the dog could walk under, over or through were it not hitched to the cart/wagon.
  - f. The dog may not pass the removable obstacle until the handler has moved the obstacle so that the dog and cart / wagon can pass safely and has commanded the dog to do so

### **C. Off -Lead Exercises and Descriptions.**

1. Harnessing and hitching are the same as in I.B.2. except that the dog is off -lead.
2. Basic Commands are the same as in I.B.3. except that the dog is off -lead.
3. Maneuvering Course is the same as in I.B.4. except that the dog is off -lead
4. One Minute Stay.
  - a. The handler commands the dog to be in the position he wishes for this exercise (stand, sit or down are all acceptable); the dog must be able to be in that position comfortably while hitched.
  - b. The handler commands the dog to stay.
  - c. The handler walks across the ring and waits for 1 minute.
  - d. Upon a signal from the judge, the handler returns to his dog.
  - e. The dog must remain in position and in place where commanded to stay.

### ***II Automatic Failure:***

Dogs and handlers doing any of the following automatically fail:

The dog leaves the ring; the judge may use his discretion as to whether the dog will be allowed to complete the exercises.

The dog upsets the cart/wagon; the judge may use his discretion as to whether the dog will be allowed to complete the exercises.

The dog eliminates in the ring; the judge may use his discretion as to whether the dog will be allowed to complete the exercises.

The dog is not under control; the dog may not complete the exercises but will be dismissed immediately.

If the handler has placed a load in the cart / wagon, the load is too heavy for the dog's condition; the judge may use his discretion as to whether the dog will be allowed to complete the exercises.

The dog or handler's behavior threatens the safety of the dog, the handler, some other dog or person, or physical property; the dog may not complete the exercises but will be dismissed immediately.

For further information , you will be directed to the NCA website with complete details:
